

***Brugmansia suaveolens***  
**(Humb. & Bonpl. ex**  
**Willd.) Sweet**

**Family:** Solanaceae

**Common name:** Angel's trumpet

**Local name:** Dhatura

**Importance:**

- Its dried flowers and leaves are used to treat strong coughs and bronchitis by inhaling its vapor.
- Aerial parts of this plant are used in ethno-medicine to alleviate ulcers and pain, as well as dermatitis.
