

Program Outcomes (POs) of M. Sc. Botany

- PO 1: In-depth information about plants and botanical skills as well as knowledge regarding environmental issues will be useful for students to become naturalists, herbalists and conservationists.
- PO 2: Detailed knowledge gained by students in subject will make them more productive researchers, academicians, scientists and entrepreneurs.
- PO 3: Subject based exercises will assist in nurturing big thinkers and creative problem solvers who will be well aware of their strengths and weaknesses.
- PO 4: Students will hone communication skills through effective presentations and interactive sessions in the class
- PO 5: Access to good quality books will develop in students the habit of life-long learning.
- PO6: First-hand knowledge acquisition during field visits to far-flung areas will allow students to gain insight into the socio-economic and health issues of their inhabitants, make them empathic towards poor sections of the society and may contribute towards their up-liftment.
- PO6: Statistics based component will make students proficient in data handling and analysis; these can be utilized later for publication and other purposes.
